ADVANTAGE: The product free-flowing, fine crystalline fertilizer, which is fully soluble in water. It is useful for excellent fruit setting, fruit development and to increase weight the fruit in all type of crops. It has low N/K ratio therefore suitable for all crops and all growing stages in crop cycle.

Dosage: 5 to 6 gm per liter of water.

CONDITION OF SALE: Always follow directions carefully. The company does not assume any liability arising out of use of this product, as usage is beyond our control. Buyer assumes all risk of use, storage and application of this product not in strict accordance with directions given herewith. It may tend to change colour overtime. However the product efficacy remain unchanged.

CUSTOMER CARE: In case of consumer queries, Please contact the Manager Customer care cell, address as mentioned on the product.

INSTRUCTION: Apply immediately after dilution. The effect of product will be reduced if used in higher temperature and before rain. Widely spray on leaves, underside of leaves, stacks and buds, Must be stored in cool and dark place and avoid direct sunlight. As use of the product is beyond our control we will not be responsible for any hazards and we guarantee uniformity in the quality of our product. Small trial is recommended before regular application. Spraying is advisable during coolest hour of the day preferably before 10 am in the morning and after 4 pm in the evening. Do not mix these fertilizers with any pesticides and fungicides.

NOTE: KEEP AWAY FROM CHILDREN FOR AGRICULTURE USE ONLY
